Project: ISKENDERUN Coal Power Plant
- Contingency Plan for the coal transhipment

Period: Dec 2001 - Jan 2002

Contract Volume: 32 000 €

Client: Steag Essen - ARKAD Deniz Tasimaciligli A.S.

Short Description: For the operation of an coal power plant in the area of Iskenderun the necessary coal will be transported by a transhipment facility from the off-shore anchored coal bulker to the unloading area at a jetty.

The scope of work for IMS shall enable ARKAD to order backup facilities for the coal discharging. IMS has investigated appropriate facilities, shipping companies and other who are in the possession of relevant vessels, barges, facilities and equipment to be available as backup facilities for the delivery of coal.

IMS has contacted shipping companies as well as inspected the available equipment.

The information are included in a investigation report which incorporated tables with the relevant companies name.
