Project: **Hochsee-Windfarm „Nordsee“ and Hochsee-Windfarm „He Dreiht“ – Technical Engineering Services**

Period: December 2002

Contract Volume: 12,500 €

Client: EOS Offshore AG

Short Description: Preliminary investigation of Tripod support structure for a 5 MW offshore wind facility in a water depth of 40 m:

- Derivatives deduced from facility and force variables metrics
- Analysis deduced from sea conditions metrics data
- Preliminary draft and design of a Tripod support structure
- Cost estimates for manufacture and installation.
